Summary

B.Tech Computer Science student focused on backend development and AI/LLM systems. Experienced in FastAPI, Node.js, OpenAI, and LangChain. Skilled in building scalable APIs and deploying AI-powered applications.

Technical Skills

Languages: Python, JavaScript, TypeScript, Java
Backend: FastAPI, Node.js, Express.js, REST APIs
AI/ML: OpenAI, LangChain, Hugging Face, RAG
Databases: Supabase, Firebase, PostgreSQL, MongoDB
Tools: Git, CI/CD, Docker, Postman
Concepts: DSA, OOP, DBMS, System Design

Experience

Backend Developer Intern (Project-Based)

Mar 2026 – Present

- Engineered FastAPI backend handling 10,000+ requests/day
- Integrated OpenAI and LangChain to enable chatbot and AI workflows
- Built RAG pipelines using embeddings and vector search
- Deployed scalable services on Render, Vercel, and Firebase with CI/CD

Projects

AI Community Assistant

- Designed and implemented 15+ REST APIs using FastAPI
- Enabled LLM chatbot with 90%+ accuracy using RAG
- Optimized API performance, reducing response time by 30%

Smart Notes API

- Implemented JWT-based authentication and role-based authorization
- Integrated OpenAI to generate automated note summaries

LLM Chatbot

- Architected chatbot using LangChain and Hugging Face models
- Connected backend services with mobile application

Blog Application

- Built backend APIs and improved query performance by 25%

Education

B.Tech in Computer Science Engineering

Chitkara University, Punjab

Aug 2023 – Jun 2027

Certifications

Python for Data Science — DSA Certification — AWS Developer (In Progress)

Achievements

- Solved 100+ DSA problems on coding platforms
- Built and deployed multiple AI-powered backend applications
