Summary

B.Tech Computer Science student specializing in **backend development, REST APIs, and scalable systems**. Proficient in **Java, Node.js, MongoDB, and Golang**. Experienced in **microservices architecture, CI/CD pipelines, and cloud deployment**. Strong communicator and collaborative team player with problem-solving skills. Focused on **secure API development**, including authentication, authorization, logging, and performance optimization.

Technical Skills

Languages: Java, Python, C, C++, JavaScript

Frontend: HTML, CSS, Tailwind CSS, Angular, React.js

Backend: Node.js, Express.js, Golang, Kotlin, Apache Kafka

DevOps & Tools: Docker, Kubernetes, Jenkins, GitLab CI, Terraform

Cloud & Databases: AWS, SQL, MongoDB

Tools: Git, GitHub, VS Code, IntelliJ IDEA, Eclipse

Core Concepts: Data Structures & Algorithms, OOP, DBMS, System Design

Practices: Agile, Scrum, CI/CD, Microservices Architecture, Unit Testing

Experience

Software Engineering Intern (Training Project)

Mar 2026 – Present

Google (Simulation / Project-Based Experience)

- Engineered Golang backend services processing **10,000+ real-time events/day**, improving throughput
- Designed Kafka-based streaming pipelines achieving **99.9% data reliability**
- Built microservices architecture, reducing service coupling by **35%**
- Implemented **Jenkins CI/CD pipelines** to automate build, test, and deployment processes
- Integrated logging and monitoring to track system performance and errors in real time
- Developed unit tests, improving code coverage and reducing production bugs

Projects

Smart Notes REST API

- Developed RESTful APIs supporting **100+ CRUD operations**
- Improved API response time by **30%** through efficient routing and caching
- Implemented authentication, authorization, and input validation for secure data handling
- Used **Terraform** for infrastructure provisioning on AWS

Blog Application (Servlet + JDBC)

- Built dynamic blog platform supporting **50+ daily user interactions**
- Optimized SQL queries, reducing latency by **25%**
- Applied MVC architecture to improve maintainability and scalability

Music App (Java + JDBC)

- Designed backend system managing **1000+ records**
- Improved data processing efficiency by **20%**

Education

B.Tech in Computer Science Engineering

Aug 2023 – Jun 2027

Chitkara University, Punjab

Certifications

- AWS Certified Developer – Associate (In Progress)
- Data Structures and Algorithms Certification (Online)

Achievements

- Solved **100+ DSA problems** on coding platforms
- Applied OOP, DBMS, and system design concepts in real-world projects
